Invitation

Innovinc International welcomes you to attend the **5th Annual Congress on Plant Science & Biosecurity (ACPSB-2025)** to be held during **June 23-24, 2025** at **Prague, Czech Republic** (and online).

The conference is organized with theme "**Pioneering Plant Science for a Sustainable Future**"

The main objective of ACPSB-2025 is to gather the most eminent scientists involved in the field of plant science to debate on the future challenges of Plant Science keeping in mind the problems of access to a sustainable agriculture, the management of resources, Human development, impact on the environment, competitiveness of our Industry, etc.

On the continuation of the previous editions, ACPB-2025 will gather more than 120 attendees who will exchange on the most recent advances in the field of plant science through plenary lectures, keynotes, oral and posters communications organized around multi-parallel sessions with 18 principal topics.

Beside the scientific program, an exhibition & business convention will be organized to enable industrials to show their innovations, to facilitate public-private and private-private partnerships, to present new challenges in R&D, to facilitate exchanges between participants, etc.

We do really hope you will enjoy this unique moment to share your vision about plant science with other countries and to contribute to the emergence of new and sustainable technologies for a better world.

We look forward to welcoming you to Prague, Czech Republic.

Sincerely,
Peter Griffin,
ACPSB -2025 conference chair

About us

Innovinc International Conferences are powered with knowledge, experience and amazing people and has managed to become one of the leading B2B event organizers. By gathering expert speakers and leading professionals, providing them with strategic knowledge and growth opportunities. Our goal is to always to focusing on innovative trends, covering the most up-to-date topics and working with top industry minds to prepare and execute the high-quality premier events. Our mission is engaged in organizing the conferences, publishing the high-quality conference proceedings, as well as providing services to scientists and young researchers on recent research updates in all fields.

Conference Sessions:

- Agronomy and Agricultural Research
- Plant Metabolic Engineering
- Crop Protection
- Plant Nutrition and Soil Sciences
- Horticulture and Floriculture
- Plant Pathology and Mycology
- Medicinal Plants and Applications
- Plant Physiology and Biochemistry
- Plant Bio-security and Risk Analysis
- Plant-Animal and Plant-Microbe interactions
- Plant Biotechnology & Plant Tissue Culture
- Plants and Climate Change
- Plant Ecology and Taxonomy
- Sustainable Agriculture
- Plant Genetics & Molecular Biology
- Plant Breeding techniques

Why You Should Attend

- To Meet renowned speakers, world's leading CEO's, Directors of polymers, assistant professors of polymers
- To know about the ongoing research projects and innovations in polymers
- Chance to collaborate research organizations with industries
- To share the research ideas and implement them
- New contacts to enhance the business opportunities
- Build relationships of influence with key people in the field
- Generate brand awareness and sales leads qualified by meaningful conversation
- Deepen your understanding of the field and how best to engage with it
- Engage with high profile international and national speakers
- Connect with potential partners and commercial allies
- Promote and showcase the new technology, the new products of your company, and/or the service your industry may offer to a broad international audience

About Prague, Czech Republic

Prague is the capital and largest city of the Czech Republic and the historical capital of Bohemia. Situated on the Vltava River, Prague is home to about 1.4 million people. It was the capital of the Kingdom of Bohemia and the residence of several Holy Roman Emperors, most notably Charles IV.

It was an important city to the Habsburg monarchy and Austria-Hungary, The city has a temperate oceanic climate, with relatively warm summers and chilly winters. An extensive modern public transportation system connects the city and has more than ten major museums, along with numerous theatres, galleries, cinemas, and other historical exhibits.
